

## Aim

To develop a RAPTOR flowchart to calculate the sum of squares of the first N natural numbers.

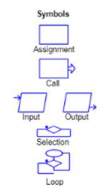

## Algorithm

1. Start the program.
2. Get the value of N from the user.
3. Initialize sum = 0.
4. Initialize i = 1.
5. Repeat the following steps while  $i \leq N$ :
  - Calculate  $\text{sum} = \text{sum} + (i \times i)$ .
  - Increment i by 1.
6. Display the value of sum.
7. Stop the program.

8.

## Result

Thus, the RAPTOR flowchart was successfully executed to calculate the sum of squares of the first N natural numbers.
