

Aim

To develop a RAPTOR flowchart to calculate the **sum of the first n natural numbers** using a loop.

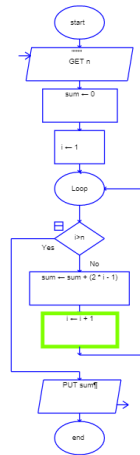

Algorithm

1. Start the program.
2. Read the value of n from the user.
3. Initialize $\text{sum} = 0$.
4. Initialize $i = 1$.
5. Repeat while $i \leq n$:
 - Add i to sum .
 - Increment i by 1.
6. Display the value of sum .
7. Stop the program

Result

The RAPTOR program was successfully executed, and the **sum of the first n natural numbers** was calculated correctly using a loop.
